

Tarbox

An economic attachment for placing Asphalt, Tar or any Screed materials. Ideal for pathways and areas that a placer machine cannot gain access. The AVANT Tarbox is available in 1500 mm width with 200 mm offset to both sides. A width reducing plate allows narrow trenches or strips to be filled. Material depth control is via screw control. The easy to operate TarBox will increase productivity on any job.

- ✔ **Fill via Truck chutes**
- ✔ **Simple Hydraulic Discharge**
- ✔ **Adjustable Strike plate for easy depth control**

Working width	1500 mm (can be reduced with the width reducing plate)
Volume	315 l
Weight	350 kg
Product no	A438861
